

Public Sector Budgeting References

“LSI Consulting is a highly trusted PBF program partner with a strong team of SAP implementation professionals. Their extensive record of successful SAP public sector implementation projects, especially in the Higher Education space, speaks for itself. From the early rollout of PBF, LSI has been a strong SAP PBF program partner providing input on product functionality, helping to build and deliver training content for the PBF academy and by providing expert support to the first implementation of PBF at the City of San Diego. I’m very confident in their ability to drive successful PBF implementations.”

Jason Beal, SAP Vice President for Public Sector Budgeting Solutions, March 2010.

“We would like to offer our highest recommendation to LSI Consulting, specifically in reference to the work they have done with us over the past 6 months in the development of a Budget Preparation environment for the University of Nebraska. Their extensive Public Sector experience and highly qualified staff have assured the success of a project initially viewed with trepidation on our part. Their project management skills have managed both the scope and timeline of the project superbly, and their specific skills in SAP BW and Integrated Planning were right on target. We have worked with many consulting companies over the years and have found that LSI consistently provides the best people at a reasonable cost, coupled with effective account management. We are looking forward to the productive success of our new Budget Prep system and give a great deal of the credit to LSI. “

Loren Blinde, University of Nebraska, March 2010

“Thank you for allowing us the opportunity to work with Ramya. I would welcome any opportunity to work with her again on any project.”

City of San Diego: Mark Mentzer, Project Manager, September 2009

“We completed the final retraction of the 2009 budget to our production system last week. It went very smooth. The entire project was a great example of how projects should be done, especially the knowledge transfer.”

Ted Trip, Texas State University San Marcos, July 2008
