

LSI Consulting is a SAP and Business Objects services partner specializing in the public sector with an exceptional reputation for quality. LSI's tremendous growth is fueled by our GovOne™, CampusOne™, and HealthOne™ template-accelerator solutions for the Public Sector markets we serve, as well as our Remote Application Managed Services business. As a result of this growth we are looking for experienced consultants for our public sector practice:

SAP SRM 7.0 Techno-Functional Consultant

Responsible for the deployment and support of the following functionalities in SRM 7.0: shopping cart processing, purchase order processing including purchase order response, bid processing, contract processing, sourcing, live auction, reverse auction. Must have knowledge of ERP integration - classic scenario and extended classic scenario, SRM workflow configuration and purchase document transmission. The candidate will provide SRM expertise including blueprinting, solution design, configuration, testing and training.

The candidate should have a broad range of SAP SRM expertise and should have good business knowledge and the understanding of how SAP SRM integrates with ECC 6.0 and where processes can be optimally deployed.

Responsibilities:

- Design and deliver solutions in accordance with the defined Technical Architecture
- Review designs and software developed within team to ensure it is in accordance with the defined Technical Architecture
- Ensure delivered solutions are able to scale to the agreed user concurrency and maintain high availability
- Liaise with infrastructure and data support services ensuring network, security and database integrity for all software systems developed by Software Development
- Assist in the establishment of and follow design standards, design patterns and best practices
- Provide technical expertise in the diagnosis and resolution of issues, including the determination and provision of workaround solutions
- Create documentation for all levels of software development life cycle
- Assist in the production of estimates for work ensuring estimates are realistic and achievable
- Coaching & development of team to maximize their full potential
- Takes full ownership of all assigned tasks ensuring objectives are met
- Meets expected standards such as accuracy, thoroughness and correctness in all assigned work

Required Skills

- SRM 7.0 with Configuration and Functional experience
- Minimum 4 years experience in SAP SRM 5.0 with Configuration and Functional experience
