

invenioLSI

Succeeding Together

**Innovative SAP solutions for
the Transportation industry**

Introduction

invenioLSI Helps Transportation Agencies and Authorities Plan Their Journey to Sap S/4HANA, Advanced Analytics and HANA Platform with Transportation Sector Implementation Experts.

Each journey to the next generation of SAP technology is unique – and we will help you plan your SAP Roadmap based on your requirements via tailored interactive workshops.

Our team of experts will make recommendations to ensure your successful move to next-generation SAP – while minimizing risks and unexpected costs.

As Public Transportation Authorities and Agencies continue to innovate and transform the offerings and services that they provide their users via multiple channels to keep pace with external pressures of alternative transportation methods like Uber & Lyft and autonomous vehicles, the same must go for their underlying technology systems. Transit Executives are looking to change business models and embrace new technologies to compete and improve and streamline the user experience. The Public Transportation sector must continue to secure and attain government funding to support the acquisition of innovative technology offerings, and, most importantly, continue to optimize, and streamline their current business operations to stay lean and effective while innovating.

This shift in the roles and responsibilities of Transportation technology organizations is bringing in a wave of new requirements, which SAP Solutions are here to support with invenioLSI migration and implementation services. Enhanced and simplified end-user experience on any device, analytics, and reporting available in real-time, tightly integrated Enterprise Asset Management Platform with Core Financial Analysis & Reporting, and Mobile Apps all housed on the world's fastest and most advanced data platform with HANA will allow the Public Transportation industry to foster employee engagement, new business models, and improved constituent service.

What our customers say

'Migrating to SAP BW/4HANA addressed our extreme need for state-of-the-art reporting technology. This strategic upgrade provides a platform that will open doors to more views of our data, bringing better insight and value to the State of Arkansas.'

Mark Rago,
Interim CIO, State of Arkansas
Department of Finance and
Administration

What our customers say

'The HISD SAP Mobility Project, delivered in partnership with invenioLSI, was the most success SAP project to date at the District. The solution has successfully streamlined our work order processes by making it smarter, more efficient and enabling more accurate data collection in the field. In addition, we were able to greatly reduce our paper consumption. We look forward to the continued digitalization of our business processes at the District – helping us achieve both our educational and operational missions.'

Tony Buehler,

Senior Manager, SAP Information Technology
